

# Contents

<i>Anatoly Anisimov, Igor Zavadskyi</i> Space-time optimization in natural language text compression .....	7
<i>Lyudmila Kovalchuk, Nataliia Kuchynska, Hanna Nelasa</i> Comparison of efficiency of Double Spend Attack for blockchains with checkpoints and without them .....	12
<i>Yevgeniya Semenova, Serhii Solodky</i> A new method for recovering high-order mixed derivatives of bivariate functions .....	17
<i>Vasyl Semenov</i> Method for the automatic modulation classification based on linear regression and feature selection .....	22
<i>Vasyl Ustimenko, Oleksandr Pustovit</i> Linear codes of Schubert cells and implementations of new quadratic public keys of Multivariate Cryptography .....	27
<i>Andrii Bomba, Oksana Ostapchuk</i> Consideration of osmosis phenomena in modeling processes by the type of filtration-convection in multiply connected areas using perturbation theory methods .....	32
<i>Mykola Budnyk</i> Boolean quantum logic operations .....	38
<i>Nataliia Vozna, Ihor Pitukh, Lydmula Hryha</i> The method of statistical processing of data of RGB pixels of color images based on the system of residual classes .....	43
<i>Bohdan Hnativ</i> Optimization of calculations in methods of the Rosenbrock type .....	48
<i>Lev Hnativ</i> Discrete fractal step multiwavelets and multiwavelet packets – a new multiwavelet technology for image processing and coding .....	53
<i>Vasyl Gorbachuk, Maksym Dunaievskyi, Seit-Bekir Suleimanov</i> An approach to computing the equilibrium product flows of competitive firms through supply chain networks under resource constraints and risky conditions .....	58
<i>Ivan Gorbenko, Maryna Yesina, Volodymyr Ponomar</i> Methodology and mechanisms of the development, assessment and comparison of international and national post-quantum standards .....	63
<i>Anatolii Hupal, Mykyta Hupal</i> Incompleteness of arithmetic and the Diophantine sets theory .....	68
<i>Ihor Demkiv</i> Approximation of the solution of the boundary value problem by the interpolation functional polynomial of the second order .....	73
<i>Yaroslav Derevianko, Olena Kachko</i> Side-channel attacks against Dilithium and countermeasures evaluation .....	78
<i>Mykola Zhurbenko, Oleksii Lykhovyd</i> On one family of subgradient algorithms with space transformation .....	83

<i>Valeriy Zadiraka, Andrii Tereshchenko, Inna Shvidchenko</i> Multi-digit arithmetic in sequential, parallel and quantum computational models .....	87
<i>Vitaly Zubenko</i> On a procedural platform for the theory of algorithms .....	92
<i>Volodymyr Ilkiv, Mykhailo Symotiuk, Yaroslav Slonovskyi</i> Metric estimates of the determinant of the Nicoletti problem for the Euler-type equation.....	96
<i>Kandii Serhii</i> Analysis of DSTU 8961:2019 CPA-to-CCA transformation in random oracle model .....	101
<i>Yevhenii Kaptol</i> Analysis of the impact of quantum computers on the security of key encapsulation mechanisms using an example of ДСТУ 8961:2019 «Скеля» ...	106
<i>Olena Kolomys, Liliya Luts</i> Effective by precision algorithms for approximation of functions from the Lipschitz class by Fourier’s series .....	111
<i>Valentina Komyak</i> Formalization and formulation of problems of modeling the movement of heterogeneous flows of people .....	116
<i>Vyacheslav Korolyov, Maksym Ogurtsov, Oleksandr Khodzinskyi</i> The interbank financial obligations routing problem.....	121
<i>Anatolii Kosolap</i> Solving large-scale multimodal optimization problems .....	126
<i>Sergii Kryvyi, Oleksii Chugaenko</i> Modification of algorithm for constructing minimal supported set of solutions of SLE over the set of natural numbers.....	131
<i>Anton Kudin, Volodimir Tkach, Svetlana Nosok</i> The problem of modern cryptography axiomatic: information, computational and information-computational approaches .....	137
<i>Oleg O. Lytvyn, Oleksandra Lytvyn, Yevheniia Khurdei</i> The method of restoring the internal structure of the 3D body based on the use of systems of three X-ray images and tomograms.....	143
<i>Vasyl Luts, Yaroslav Luts</i> To use a modified delta algorithm for image processing and coding .....	148
<i>Petro Malachivskyy, Lev Melnychok</i> Chebyshev approximation multivariable functions with the interpolation of the value of the function and its partial derivative.....	153
аченням функції та частинної похідної .....	153
