

# Contents

<i>Oleksandra Manziy, Volodymyr Hladun, Viktor Seredynskyi</i> Continuants algorithm for evaluation approximants of branched continued fraction .....	7
<i>Nataliya Maslova</i> Abstractions of reverse engineering in the control and construction of protected software implementations.....	12
<i>Yaroslav Matviychuk</i> Mathematical Model Reduction Principle and it's applications.....	17
<i>Anastasija Nedashkovska, Ivan Gusak</i> Using of parallel calculations in the approximate solving of one-sided matrix equations.....	22
<i>Mykola Nedashkovskyy</i> Convergence of expansions into continued fractions of solutions of matrix polynomial equations .....	27
<i>Alla Nesterenko, Oleksandr Duchenko</i> Application of mixed precision for solving systems of nonlinear equation by quasi-Newtonian methods .....	32
<i>Olesia Nechuiviter, Serhii Ivanov, Kovalchuk Kyrylo</i> Approximate calculation of double integrals from rapidly oscillating functions of the general form .....	37
<i>Yaroslav Nykolaychuk, Volodymyr Hryha, Oleh Zastavnyi</i> High-performance synchronized matrix ALU multiplication processor for supercomputers.....	42
<i>Anatoliy Obshta, Oleksandr Shkurgan</i> Diagnostics of oil product leakage detection in main oil pipelines .....	47
<i>Yelyzaveta Ostrianska, Yurii Gorbenko</i> Current state of standardization of post-quantum cryptography .....	52
<i>Alexander Pavlov, Elena Khalus, Mykhailo Medvediev</i> Minimization of the total weighted earliness of tasks on a single machine .....	57
<i>Yaroslav Pelekh, Andrii Kunynets, Bohdan Pakholok</i> Embedded methods with two-sided local error estimation for solving nonlinear integro-differential equations .....	62
<i>Iuliia Pershyna</i> Approximation of discontinuous 3D functions by discontinuous interflotation splines..	67
<i>Volodymyr Petrenjuk, Dmytro Petrenjuk</i> On the algorithm for constructing 2-connected minors of the Klein surface .....	72
<i>Yaropolk Pizyur, Yurii Karas</i> Hermitian splines with exponential power links with an odd number of parameters.....	77
<i>Olexandr Polishchuk</i> Communities in multilayer network systems.....	82
<i>Viktor Polyanko, Volodymyr Sydoruk, Tamara Chistyakova</i> Algorithmic software tool for analyzing the strength of building structures on parallel computers .....	88

<i>Alexandr Popov, Alexey Chystiakov</i> Reliability of Computer Solutions in the Study of natural oscillations .....	93
<i>Oleksandr Provotar, Oleksandr Ilkun</i> Categories as formal models of calculations.....	98
<i>Marta Savkina</i> Equality of MNK and Aitken estimations of the parameter of the linear regression model, when the covariance matrix of the deviations is a symmetric Toeplitz matrix of the general form .....	103
<i>Gennadiy Sandrakov</i> Homogenization and modeling of wave processes in composites with a periodic structure .....	108
<i>Andrii Segin, Ivan Adbanskyi, Alina Davletova</i> Correlation models in the polar coordinate system for determining the mutual influence of cyclic processes and their implementation on the basis of correlation special processors .....	113
<i>Volodymyr Semenov, Oleh Kharkov</i> Operator extrapolation method for variational inequalities in Banach spaces.....	118
<i>Petro Stetsyuk, Olha Khomiak, Volodymyr Zhydkov</i> Coordinate scaling for building naturally parametrized curve with cubic curvature .....	123
<i>Nadija Tymofijeva</i> Classification of natural and artificial intelligence .....	128
<i>Kostiantyn Tokar</i> Numerical solution of variable-order subdiffusion equation in a multidimensional space .....	133
<i>Andrii Fesenko</i> Improvement of the deterministic preparation of Dicke states .....	138
<i>Oleksandr Khimich, Olena Nikolaeivska, Igor Baranov</i> Peculiarities of using multiple precision arithmetic in mathematical modeling .....	143
<i>Bohdan Shevchuk</i> Express analysis of biomedical signals in the process of long-term monitoring of functional states .....	149
<i>Dariya Yadukha</i> The necessary conditions for the key generation of the quantum-resistant AJPS-1 cryptosystem .....	154
